VOLUME 43, NUMBER 3, MAY 2004

Fabio Rindi and Michael D. Guiry. Composition and spatial variability of terrestrial algal assemblages occurring at the bases of urban walls in Europe 225–235

Kristen L.D. Milligan and Robert E. DeWreede. Morphological variations do not effectively reduce drag forces at high wave-exposure for the macroalgal species, *Hedophyllum sessile* (Laminariales, Phaeophyta) . . . 236–244

Linda K. Medlin and Irena Kaczmarska. Evolution of the diatoms: V. Morphological and cytological support for the major clades and a taxonomic revision 245–270

Imojen Pearce and Gustaaf M. Hallegraeff. Genetic affinities, ecophysiology and toxicity of *Prorocentrum playfairii* and *P. foveolata* (Dinophyceae) from Tasmanian freshwaters 271–281

Elena Varela-Alvarez, Dagmar B. Stengel and Michael D. Guiry. The use of image processing in assessing conchocelis growth and conchospore production in *Porphyra linearis* 282–287

Roberta A. Townsend and John M. Huisman. *Epulo multipedes* gen. et sp. nov. (Corallinaceae, Rhodophyta), a coralline parasite from Australia 288–295

John M. Huisman, Isabella A. Abbott and Alison R. Sherwood. The Liagoraceae (Nemaliales, Rhodophyta) of the Hawaiian Islands III: the genus *Ganonema*, with a description of *G. yoshizakii* sp. nov. 296–310

Kwang Young Kim, David J. Garbary and Jack L. McLachlan. Phytoplankton dynamics in Pomquet Harbour, Nova Scotia: a lagoon in the southern Gulf of St Lawrence 311–328

Valéria Cassano, Yocie Yoneshigue-Valentin and Michael J. Wynne. *Elachistiella leptonematoides* gen. et sp. nov. (Elachistaceae, Phaeophyceae) from Brazil 329–340

VOLUME 43, NUMBER 4, JULY 2004

David U. Hernández-Becerril and Ernesto Bravo-Sierra. Observations on a rare planktonic dinoflagellate, *Dinofurcula* cf. *ultima* (Dinophyceae), from the Mexican Pacific 341–345

B. Santelices, M. Hormazábal, J. Correa and V. Flores. The fate of overgrown germlings in coalescing Rhodophyta 346–352

Gay M. Kennaway and Jane M. Lewis. An ultrastructural study of hypnozygotes of *Alexandrium* species (Dinophyceae) 353–363

Hillary S. Hayden and J. Robert Waaland. A molecular systematic study of *Ulva* (Ulvaceae, Ulvales) from the northeast Pacific 364–382

Tomomi Yano, Mitsunobu Kamiya, Shogo Arai and Hiroshi Kawai. Morphological homoplasy in Japanese *Plocamium* species (Plocamiales, Rhodophyta) inferred from the Rubisco spacer sequence and intracellular acidity 383–393

Mitsunori Iwataki, Gert Hansen, Tomohiro Sawaguchi, Shingo Hiroishi and Yasuwo Fukuyo. Investigations of body scales in twelve *Heterocapsa* species (Peridiniales, Dinophyceae), including a new species *H. pseudotriquetra* sp. nov. 394–403

José C. Báez, Raimundo Real, J. Mario Vargas and Antonio Flores-Moya. A biogeographical analysis of the genera *Audouinella* (Rhodophyta), *Cystoseira* (Phaeophyceae) and *Cladophora* (Chlorophyta) in the western Mediterranean Sea and Adriatic Sea 404–415

Fernando Gómez, Yukio Nagahama, Yasuwo Fukuyo and Ken Furuya. Observations on *Ceratoperidinium* (Dinophyceae) (Research note) 416–421

Annette W. Coleman. FishPond revisited: how can microalgae be perennials? 422–426

J. Patrick Kociolek, Sarah A. Spaulding, Koen Sabbe and Wim Vyverman. New *Gomphonema* (Bacillariophyta) species from Tasmania 427–444

Peter S. Vroom and Isabella A. Abbott. *Scinaia huismanii* sp. nov. (Nemaliales, Rhodophyta): an addition to the exploration of the marine algae of the northwestern Hawaiian Islands 445–454

Bruno Fumanti and Silvia Alfinito. *Brachytheca inopinata* (Desmidiaceae, Zygnematophyceae), a new desmid from New Zealand 455–458

David G. Mann, Sarah M. McDonald, Micha M. Bayer, Stephen J.M. Droop, Victor A. Chepurnov, Robert E. Loke, Adrian Ciobanu and J.M. Hans du Buf. The *Sellaphora pupula* species complex (Bacillariophyceae): morphometric analysis, ultrastructure and mating data provide evidence for five new species . . 459–482

Kwang Young Kim, Tae Seob Choi, Jeong Ha Kim, Taejun Han, Hyun Woong Shin and David J. Garbary. Physiological ecology and seasonality of *Ulva pertusa* on a temperate rocky shore 483–492

VOLUME 43, NUMBER 5, SEPTEMBER 2004

Tse-Min Lee. Induction of acid phosphatase activity by phosphorus deficiency in *Gracilaria coronopifolia* (Gigartinales, Rhodophyta) 493–500

Ji Hee Kim, Hosung Chung, Do Sung Choi and In Kyu Lee. A new melobesioid alga *Synarthrophyton chejuensis* sp. nov. (Corallinales, Rhodophyta), including comparison with *Mesophyllum cystocarpideum* . . 501–520

Bao Sheng Qiu, Ai Hong Zhang, Zhi Li Liu and Kun Shan Gao. Studies on the photosynthesis of the terrestrial cyanobacterium *Nostoc flagelliforme* subjected to desiccation and subsequent rehydration 521–528

Lothar Krienitz, Eberhard H. Hegewald, Dominik Hepperle, Volker A.R. Huss, Thomas Rohr and Matthias Wolf. Phylogenetic relationship of *Chlorella* and *Parachlorella* gen. nov. (Chlorophyta, Trebouxiophyceae) 529–542

Ioannes Tsekos, Hans-Dieter Reiss and Stylianos G. Delivopoulos. The supramolecular organization of photosynthetic membranes in the red alga *Thorea ramosissima*: spatial relationship between putative photosystem II core particles (EF-particles) and phycobilisomes 543–551

F. Hoe Chang and Ken G. Ryan. *Karenia concordia* sp. nov. (Gymnodiniales, Dinophyceae), a new nonthecate dinoflagellate isolated from the New Zealand northeast coast during the 2002 harmful algal bloom events 552–562

Craig W. Schneider. Notes on the marine algae of the Bermudas. 6. Some rare or newly reported Ceramiales (Rhodophyta), including *Crouania elisiae* sp. nov.. 563–578

Andrzej Witkowski, Horst Lange-Bertalot, J. Patrick Kociolek, Manfred Ruppel, Brygida Wawrzyniak-Wydrowska, Malgorzata Bak and Agnieszka Brzezinska. Four new species of *Nitzschia* sect. *Tryblionella* (Bacillariophyceae) resembling *N. parvula* 579–595

G. Rajakrishna Kumar, C.R.K. Reddy, M. Ganesan, S. Thiruppathi, Shikh Dipakkore, K. Eswaran, P.V. Subba Rao and Bhavanath Jha. Tissue culture and regeneration of thallus from callus of *Gelidiella acerosa* (Gelidiales, Rhodophyta) 596–602

Michael Y. Roleda, Dieter Hanelt, Gudrun Kräbs and Christian Wiencke. Morphology, growth, photosynthesis and pigments in *Laminaria ochroleuca* (Laminariales, Phaeophyta) under ultraviolet radiation . . . 603–613

Michael Schweikert and Malte Elbrächter. First ultrastructural investigations of the consortium between a phototrophic eukaryotic endocytobiont and *Podolampas bipes* (Dinophyceae) 614–623

Miguel F. de Salas, Christopher J.S. Bolch and Gustaaf M. Hallegraeff. *Karenia asterichroma* sp. nov. (Gymnodiniales, Dinophyceae), a new dinoflagellate species associated with finfish aquaculture mortalities in Tasmania, Australia 624–631

Kanako Naito, Mitsuko Suzuki, Masakazu Matsui and Ichiro Imai. Secretion of iron-complexing ligands from *Closterium aciculare* (Charophyceae, Chlorophyta) under iron-deficient conditions (Research note) . . 632–634

Karl-Ferdinand Lechtreck. An immunofluorescence study of the haptonema of *Chrysochromulina parva* (Prymnesiophyceae) (Research note) 635–640

VOLUME 43, NUMBER 6, NOVEMBER 2004

William J. Henley, Janice L. Hironaka, Laure Guillou, Mark A. Buchheim, Julie A. Buchheim, Marvin W. Fawley and Karen P. Fawley. Phylogenetic analysis of the '*Nannochloris*-like' algae and diagnoses of *Picochlorum oklahomensis* gen. et sp. nov. (Trebouxiophyceae, Chlorophyta) 641–652

Susan Badylak, Karen Kelley and Edward J. Phlips. A description of *Pyrodinium bahamense* (Dinophyceae) from the Indian River Lagoon, Florida, USA 653–657

Wenche Eikrem, Khadidja Romari, Mikel Latasa, Florence Le Gall, Jahn Throndsen and Daniel Vaulot. *Florenciella parvula* gen. et sp. nov. (Dictyochophyceae, Heterokontophyta), a small flagellate isolated from the English Channel 658–668

Guoxiang Liu and Zhengyu Hu. Predominant occurrence of apical cell divisions in *Oedogonium pakistanense* and its phylogenetic significance 669–671

Hidetoshi Sakayama, Yoshiaki Hara, Shogo Arai, Hiroshi Sato and Hisayoshi Nozaki. Phylogenetic analyses of *Nitella* subgenus *Tieffallenia* (Charales, Charophyceae) using nuclear ribosomal DNA internal transcribed spacer sequences 672–681

Shoichiro Suda. Taxonomic characterization of *Pyramimonas aurea* sp. nov. (Prasinophyceae, Chlorophyta) 682–692

Vasilios Varvarigos, Christos Katsaros and Basil Galatis. Radial F-actin configurations are involved in polarization during protoplast germination and thallus branching of *Macrocystis pyrifera* (Phaeophyceae, Laminariales) 693–702

Goro Yoshida, Noboru Murase, Shogo Arai and Toshinobu Terawaki. Ecotypic differentiation in maturation seasonality among *Sargassum horneri* (Fucales, Phaeophyta) populations in Hiroshima Bay, Seto Inland Sea, Japan 703–710

Atsushi Nakazawa, Toshihiro Yamada and Hisayoshi Nozaki. Taxonomic study of *Asterococcus* (Chlorophyceae) based on comparative morphology and *rbc*L gene sequences 711–721

Erika Asamizu, Yasukazu Nakamura, Kenji Miura, Hideya Fukuzawa, Shoko Fujiwara, Masafumi Hirono, Koji Iwamoto, Yoshihiro Matsuda, Jun Minagawa, Kosuke Shimogawara, Yuichiro Takahashi and Satoshi Tabata. Establishment of publicly available cDNA material and information resource of *Chlamydomonas reinhardtii* (Chlorophyta) to facilitate gene function analysis 722–726

Dian Hendrayanti, Takashi Denboh, Terunobu Ichimura and Taizo Motomura. Molecular evidence of parallel origins of two different parthenosporic lineages directly from heterothallic lineages in the *Closterium moniliferum–ehrenbergii* (Charophyceae, Chlorophyta) species complex 727–736

Giovanna Flaim, Gert Hansen, Øjvind Moestrup, Flavio Corradini and Basilio Borghi. Reinterpretation of the dinoflagellate '*Glenodinium sanguineum*' in the reddening of Lake Tovel, Italian Alps 737–743

Laura Cunningham and Andrew McMinn. The influence of natural environmental factors on benthic diatom communities from the Windmill Islands, Antarctica 744–755

Rui Pereira, Isabel Sousa-Pinto and Charles Yarish. Field and culture studies of the life history of *Porphyra dioica* (Bangiales, Rhodophyta) from Portugal 756–767

Kevin B. Strychar, Paul W. Sammarco and Terrence J. Piva. Apoptotic and necrotic stages of *Symbiodinium* (Dinophyceae) cell death activity: bleaching of soft and scleractinian corals 768–777
